(BACE: Bureau d'Accueil des Chercheurs Etrangers)
Paris, France** (veronique.gillet-didier@ciup.fr)

**Institute of Fundamental Technological Research
Warszawa, Poland** (anna.wisniewska@kpk.gov.pl)

The strategic objective of the DISCOVER Europe project is straighten the EURAXESS network by stimulating the cooperation between the European Mobility Centres.

In order to attempt this ambitious goal two specific objectives have been considered:

- a) Increasing the expertise of the New Member states Mobility Centres (Romanian and Bulgarian) using the experience of other European Mobility Centres in order to reduce the disparities between the network members

This is to be done through improvement of knowledge and competence of the new member states mobility centres in Bulgaria and Romania through knowledge transfer, know-how and on-site training provided by the more experienced Mobility Centres from older EU member states, i.e. France and Poland. Finally a Green Charta of cooperation between the four mobility centres will be set up in order to establish a long term strategy for cooperation.

- b) Setting up a pilot action aimed to support the networking with other European Centres in order to increase the cooperation within the ERA-MORE network

The project will start a two pilot action (Discover Romania and Discover Bulgaria) aimed to support the networking activities among EU Mobility Centres in order to increase the cooperation within the EURAXESS network.

Through this ambitious goal the Discover Europe project will support the removing of obstacles to mobility and enhancing the career perspectives of researchers in Europe both coming and going to the two New Member States (Romania and Bulgaria). Also, the ambition of Discover Europe project is to increase the level of EURAXESS services across Europe.

The Discover Europe work plan gathers a coherent set of activities that will fulfil these ambitious goals. The work within the project is divided in 5 work packages: 2 administrative (WP1 Management and WP2 Dissemination), 1 work package of support activity (WP3 Know-how exchange) and 2 work packages of coordination activities (WP4 National coordination and WP5 International coordination).

Through these goals Discover Europe will support the EURAXESS network and help in removing important barriers for European mobility.

Let's Discover Europe together!
